Giving a Taste of Their Own Medicine

- 31 May** **Ophthalmology update 2022: advances and challenges in the battle against blindness**
-Dr Logan Mitchell, Eye Department, Dunedin Hospital
- 7 June** **The medical mind of Shakespeare**
Most of Shakespeare's plays have references to disease and treatments, showing an intriguing depth of medical knowledge. He favours herbs and minerals, knew the function of the pia mater covering the brain and had great insight into mental illness. Many of his medical references are cloaked in naughty puns, like the curing of the King's anal fistula in *All's Well that Ends Well*.
-Professor Terry Doyle, Radiology Department, Dunedin Hospital
- 14 June** **IR in IO: the role of intervention in metastatic colorectal metastases**
-Dr Gabriel Lau, Radiology Department, Dunedin Hospital and Pacific Radiology
- 21 June** **Structural heart disease: the evolution of intervention without surgery**
-Associate Professor Gerry Wilkins, Cardiology Department, Dunedin Hospital
- 28 June** **The history of transfusion and iron rediscovered: tracing the history of transfusion medicine and the new work on iron metabolism and its importance**
-Dr Jim Faed, Retired Haematologist, Dunedin Hospital
- 5 July** **Joint ventures: a look at the changing world of joint disease**
-Mr John Matheson, Retired Orthopaedic Surgeon, Dunedin Hospital
